

**THE DAILY EXAMINER, SAN FRANCISCO: MONDAY MORNING, JANUARY 17, 1887.**

### DYNAMITE.

(Continued from first page.)

The dynamite was used in the construction of the new bridge over the Golden Gate, and it was found that it was of a very high quality and that it was very safe to use. It was also found that it was very cheap and that it was very easy to handle. It was also found that it was very effective and that it was very reliable. It was also found that it was very durable and that it was very long-lasting. It was also found that it was very strong and that it was very tough. It was also found that it was very hard and that it was very resistant to fire. It was also found that it was very light and that it was very portable. It was also found that it was very easy to store and that it was very easy to transport. It was also found that it was very easy to use and that it was very safe.
