Wait Until the Allies Present Their Bill For Damages To Germany

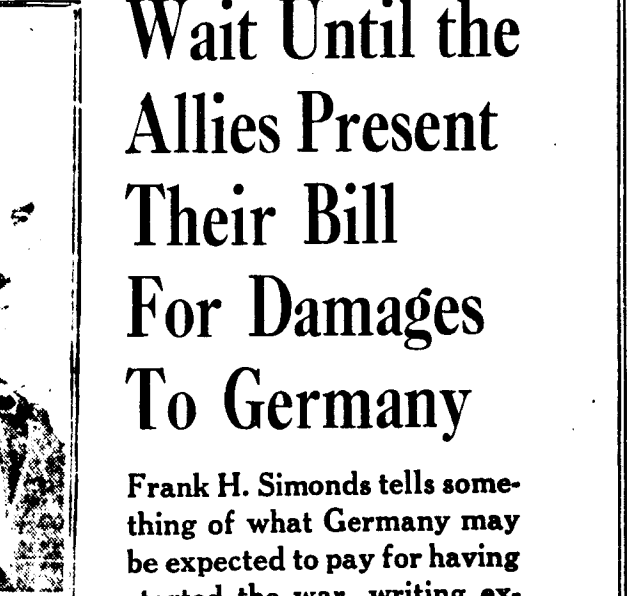

Frank H. Simonds tells something of what Germany may be expected to pay for having started the war, writing exclusively for

Next Sunday's Chronicle

Certainly, Germany must indemnify Belgium and France, says this war expert. She must restore Alsace-Lorraine and the 200,000 Danes of Northern Schleswig. She must pay for her illegal submarine depredations, whether tooth for tooth or in money. All this is a part of the penalty to be imposed by the allies in the process of making a "good European" of Germany. And to insure keeping the Germans on their reservation, Simonds says, their subject peoples—the Poles, Serbians, Rumanians, Greeks, Czecho-Slavs and Jugo-Slavs—must be liberated, thereby raising a barrier against further Prussian lust for world empire.
