Talks Through the Air Without Wires

Two of Mr. McArthur's Assistants, George Johnson on the left and Frank Adams on the right.

PROBLEM SOLVED BY YOUNG LAD

His Experiments on Beach Aim of a Nature to Convince His Audience of Truth of Claim.

In the experiments made yesterday on the beach before the Cliff House, the young lad, who has been making a name for himself in the past few days, has solved the problem of wireless communication. He has demonstrated that it is possible to communicate with a person at a distance without the aid of wires. The lad, who is named George Johnson, is a student at the University of California. He has been making a name for himself in the past few days by his experiments on the beach. He has demonstrated that it is possible to communicate with a person at a distance without the aid of wires. The lad, who is named George Johnson, is a student at the University of California.
